SUVA TYPE FOUNDRY
SPECIMEN NO. 1

SUVA Type Foundry Specimen No. 1, published on the occasion of the launch of SUVA Type Foundry, presents a selection of original fonts created 2010–2018 at the Department of Graphic Design, Estonian Academy of Arts (EKA GD). SUVA Type Foundry is a web platform featuring fonts designed by students and faculty in various workshops, courses and projects. The platform and specimen gathering the typefaces exhibits the department's ever-growing archive.

SUVA Type Foundry Specimen No. 1 introduces a selection of fonts from the web platform and various printed matter, where the fonts have been used.

including facial expressions, common objects, places and types of weather, and animals. They are much like emoticons, but emoji are actual pictures instead of typographics. Originally meaning pictograph, the word emoji comes from Japanese e (“picture”) + moji (“character”). The resemblance to the English words emotion and emoticon is purely coincidental. The ISO 15924 script code for emoji is Zsye.

Typeface based on solid metal letters from the former roof of the Kalev Sports Hall in Tallinn.

Nocturnal 2016 Katarina Sarap

Font presents a wish to find out what happens in our heads while sleeping, and to catch our dreams before they slip away.

They are now considered to be a large part of popular culture in the west. In 2015, Oxford Dictionaries named the Face with Tears of Joy emoji the Word of the Year.

The development of emoji was predated by text-based emoticons, as well as graphical representations, inside and outside of Japan.

The first emoji was created in 1999 in Japan by Shigetaka Kurita. He was part of the team working on NTT DoCoMo's i-mode mobile Internet platform.

A simpler script for teaching handwriting at Estonian elementary schools.

them to take on culture-specifc meanings not present in the original glyphs. For example, NAIL POLISH has been described as being used in English-language communities to signify "non-caring fabulousness" and "anything from shutting haters down to a sense of accomplishment". Unicode manuals sometimes provide notes on auxiliary meanings of an object to guide designers on how emoji may be used, for example noting that some users may expect
